

PROJECT FIRSTLINE

Sessions will be repeated at multiple locations throughout Kansas, choose which works best for you!

November 18: Holton, Kansas

December 8: Attica Kansas

December 9: Salina, Kansas

December 21: Garden City, Kansas

December 22: Colby, Kansas

January 3: Emporia, Kansas

January 4: Chanute, Kansas

KFMC Health Improvement Partners has partnered with KDHE to facilitate this in person infection prevention education for frontline staff (CNA, Dietary, Housekeeping, Laundry) in Kansas long term care and communal living facilities throughout the state of Kansas.

Goal:

The goal at Project Firstline is to make sure you have the infection control knowledge that you need and deserve to keep yourself, your patients, your colleagues, and your family safe. To stop the spread of infectious disease threats—including COVID-19—anyone working in a healthcare facility needs a basic knowledge of infection control and must understand and be ready to use infection control processes and procedures throughout their workday, including during every patient care activity and healthcare interaction. CDC's Project Firstline is a collaborative of diverse healthcare, public health, and academic partners that is working to provide engaging, innovative, and effective infection control training for millions of frontline U.S. healthcare workers as well as members of the public health workforce.

Objectives:

Upon session completion, participants will be able to:

1. Articulate at least one (1) primary goal of infection control
2. Explain one (1) reason why good hand hygiene and environmental cleaning are important to keep germs from spreading in healthcare
3. Describe 2 ways viruses can spread from surfaces to people

Program Facilitators:

Loretta Fitzgerald, BSN, RN, Quality Improvement Consultant

Nadyne Hagmeier, RN, Quality Improvement Consultant
